

DoD/DHHS MH MOA PHS VACANCY ANNOUNCEMENT

FOCUS AREA

Agency leadership has determined that this position meets Criteria 4: Assignment requires regular engagement with other uniformed services.

POSITION TITLE

Physical Therapist, (O-5 Billet, Supervisory). Civilian Billet- GS-0633-13

LOCATION DESCRIPTION

Fort Bragg is the home of the Airborne and Special Operations. When America needs her armed forces, the first phone call is to Fort Bragg. Originally known as Camp Bragg, Fort Bragg was founded in 1918 as an artillery training post. It is the largest U.S. military installation in terms of population. Fort Bragg has approximately 53,700 troops and another 14,000 civilians who work on post. The post supports a population of roughly 260,000, including military Families, contractors, retirees and others. Fort Bragg covers approximately 500 sq. miles, which is nearly 163,000 acres. 146,000 of those acres are dedicated training lands.

CLOSING DATE

Open until filled

*** JOB DESCRIPTION***

Specific duties and responsibilities include, but are not limited to the following:

Incumbent performs as a highly specialized physical therapist (PT) within the Intrepid Spirit program established for tertiary care for TBI and complex psychological and pain disorders. Designated for unparalleled diagnoses, treatment, and research within the TBI/BH/Pain field, the degree of caseload complexity and professional challenge represent the top echelon of Department of Defense (DoD) PT pathology. The Intrepid Spirit provides a level of capability to address the most complex diagnostic and treatment challenges for patients with traumatic brain injury (TBI) and complex psychological pain and social challenges suffering from persistent impairment of function. The PT is an integral and critical clinical member of the integration team, with primary responsibilities consisting of physical, neuromuscular, and vestibular evaluations, assessment of functional capabilities, and development of a treatment plan accordingly.

Develops and implements complex treatment plans for patients presenting with multiple health dysfunction and impairments in physical, functional, and adaptive areas; i.e., gait, functional daily activities, adaptive sports, reconditioning, physical readiness training, injury prevention, human performance optimization, pain impairments, and reintegration. Plans, coordinates, and implements goal-oriented group and/or focused individual PT treatment programs, selecting activities to increase or improve muscle strength, range of motion, and coordination.

DoD/DHHS MH MOA PHS VACANCY ANNOUNCEMENT

Participates in advanced clinical research projects, relative to physical therapy or vestibular mechanism, and the rehabilitation of physical and vestibular disorders. Participates in the development of protocols to investigate efficacy and effectiveness of new clinical tests, clinical practice guidelines, and standards of care. Supports the research function, directing physical therapy students, externs, residents, and fellows/trainees engaged in research assignments in preparation of theses, dissertations, and other graduate medical education GME projects.

Supervises approximately 3-10 rehabilitation staff clinicians and/or technicians. Evaluates overall work accomplishment of the staff; reviews group and individual performance for consistency with policies, compliance with procedures and regulations, technical adequacy, timeliness and effective utilization of resources. Assigns work to subordinates based on priorities, work requirements, and employee capabilities. Develops performance standards and evaluates work performance. Performs all required personnel management tasks. Establishes performance standards and ensures equity for performance standards and evaluations.

CONDITIONS OF EMPLOYMENT:

Graduate of a Physical Therapy program that is accredited by the Commission on Accreditation in Physical Therapy Education, American Physical Therapy Association. Must possess a valid and current State Physical Therapist license. Comprehensive knowledge and skill in providing specialized physical therapy services, including vestibular rehabilitation, for the treatment of patients with a history of traumatic brain injury. Previous military service and supervisory experience are highly desired.
